Skills

Programming Languages

C, TypeScript, Lua, Python, Bash

Web Development

Node.js, React

Databases

MySQL, PostgreSQL, SQLite, Firebase, MongoDB

Languages

Georgian (Native)

English (C2)

I am a software developer with a strong passion for physics-based simulations and modeling. I enjoy tackling complex problems and turning scientific concepts into code, drawing from both personal projects and industry experience.

Education

Tbilisi State University **2018 - 2021**

Physics

Tbilisi State University **20/05/2020 - 14/06/2020**

Fundamentals of Machine Learning (Exclusive Course)

Experience

MultiTask **04/2023 – 02/2024**

Frontend Web Developer Tbilisi, Georgia

- Built a web interface and integrated it with a backend API
- Handled hardware and software maintenance for office computers

Projects

Enjhin **01/02/2024 – Current**

Developed soft body physics engine with my friend using C and raylib.

source: <https://github.com/datuchela/enjhin>

Fizziks **21/04/2023 – 24/08/2023**

Developed web-based soft body and rigid body physics engines.

rigid body: <https://fizziks.netlify.app>

soft body: <https://fizziks-softbody.netlify.app>
